# 9 week schedule

✓ programming ✓ bulk

mid term exam

Part.

(quiz)

mini project

60	40	50	150 points
30	37	44	116

$$\frac{116}{150} \rightarrow \sim 77.3$$

programming ✓

Semester final

major project

(quiz)

mult-person project - TBI

NO GRADES ARE POSTED IN CANVAS

# Assignment

Can be changed mutable

immutable

Cannot be changed

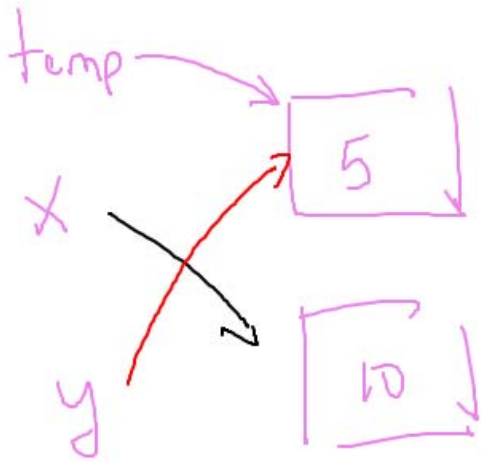

## Python & Processing

immutable — constant (ints, floats)  
Strings

$x = 5$   
 $y = 10$

want  $x = 10, y = 5$   
Swap

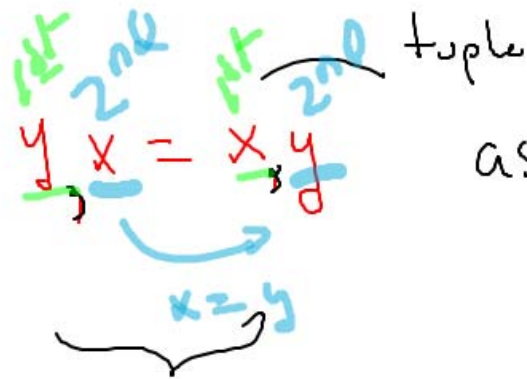

$x = y$   
 $y = x$  both 10

answer:

Python, processing (+)

temp = x ✓  
x = y ✓  
y = temp ✓

Swap

assignment by position

unpacking a tuple

$x = 5$

$y = 10$

$z = 20$

python only

$z = 5$

$y = 20$

$x = 10$

Happy BD to you }  
" " " }  
" " " }  
" " " }

Happy BD dear Stars,

Happy BD to you

for Loop → definite loop

Syntax: for <variable> in <sequence>;  
indent <body>

body of for loop is identified by indent

Sequence: String  
list

Sequenced: string  
list → [x, x, y, z]

Sum the first  $n$  natural numbers

$$\mathbb{N} = \{1, 2, 3, 4, 5, \dots\} \checkmark \text{ in this class}$$

$$\left( \mathbb{N} = \{0, 1, 2, 3, 4, 5, \dots\} \right)$$

$$\begin{array}{cccccc} n=5 & & & & & \\ \hline \text{wast.} & \xrightarrow{1^{\text{st}}} & \xrightarrow{2^{\text{nd}}} & \xrightarrow{3^{\text{rd}}} & \xrightarrow{4^{\text{th}}} & \xrightarrow{5^{\text{th}}} \\ 1 & + & 2 & + & 3 & + & 4 & + & 5 & = & (15) \end{array}$$

$$1 + 2 + 3 + 4 + 5$$

naturalNums=[1,2,3,4,5]

total=0

for number in naturalNums: →

total=total+number

print("The total is",total)

15

total = 0

number = 1

~~total~~ = ~~total~~ + ~~number~~    total = 1

number = 2

~~total~~ = ~~total~~ + ~~number~~    total = 3

~~total~~ = ~~total~~ + ~~number~~ = 6 → total = 6

~~total~~ = ~~total~~ + ~~number~~    6 + 4 = 10 = total

total = ~~total~~ + ~~number~~    10 + 5 = 15 = total

range → generates an iterable sequence

string  
list

iterate

for <var> in <seq>:  
    <body>

range(5) → 0, 1, 2, 3, 4  
                 ↑                  ↘ ends 1 less than 5  
                 starts at zero

in general

range(n) → 0, 1, 2, 3, 4, ..., n-2, n-1
