

**SUMMER  
BRIDGE  
WOMEN IN  
STEM**

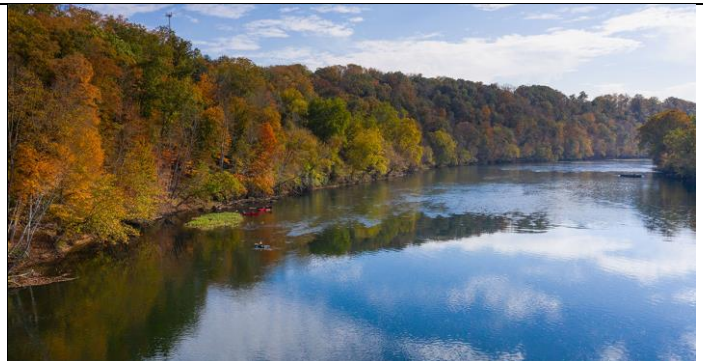

**JULY 13<sup>TH</sup> – 18<sup>TH</sup>  
2025**

The Radford University Summer Bridge Women In STEM program is an exciting way for high school students to engage with science and technology.

On our campus they have a chance to participate in fun experiments, learn some basics and beyond in many different fields, and make great friendships!

IT'S FREE! We offer scholarships so students just have to make travel arrangements to be in Radford at the start of the program and travel arrangements home. We take care of classes, meals, lodging and any local transportation as part of the program.
